NURSING RESEARCH

INDEX TO VOLUME 14 **WINTER, SPRING, SUMMER, FALL 1965**

This index is in two parts: the first is an index to **Articles, Briefs, Research Reporter,** and **Researcher's Bookshelf** and the second is an index to the **Abstracts.** Both indexes are arranged alphabetically by author, subject and location of the institution or agency in which the study was made. That is, a study on the geriatric aspects of a psychiatric home care program in Canada would have entries under GERIATRICS, HOME CARE SERVICE, PSYCHIATRY AND NURSING, and CANADA. The page number is indicated after each entry and in the **Abstract Index** it is immediately followed by the number of the abstract, for example 95(58). The following abbreviations are used: (ed)—editorial; (bk rev)—book review; (exc)—excerpt; (RR)—Research Reporter.
